

Dear Secretary Price,

I am writing to you as a voter and taxpayer urging you to take immediate action to suspend any further implementation of the 2016 FDA deeming regulations. As a vapor product consumer, I am extremely concerned that if action is not taken soon, I will lose access to life-saving vapor products. Certainly, if *no* action is taken before August of 2018, the products that help me live smoke-free will be removed from the market almost completely.

If implementation of FDA regulation of vapor products continues without serious and thoughtful reform, I am certain that my local vapor shop will close. Vapor shops play a vital role both in providing access to life-saving products and as community spaces where former smokers can find support. This is a support network that has developed on its own and at no cost to taxpayers. While losing access to the diverse vapor market will be a blow to public health and consumer choice, closing the doors on a community support network will ensure that smokers are left out in the cold.
